**BOLTON  
& MENK**

Real People. Real Solutions.

This firm traces its origins to Midwesterners John Bolton and Martin Menk, whom began addressing the challenge of aging infrastructure in local communities back in 1949. Founded as a surveying business in St. Peter, MN, the firm kept busy surveying parcels and planning subdivisions on the heels of a housing development boom after WW2. From these humble origins grew the 3rd largest engineering firm in the metro area, dedicated to their founding vision of hard work, expertise, and commitment to their clients.

Today, Bolton & Menk is one of Star Tribune's "Top 150 Workplaces in Minnesota" and is a leading consulting engineer for the transportation industry.
