The Science You Build On.

"In 1957, company founder Jack S. Braun was newly graduated from the University of Minnesota with a B.S. in Civil Engineering when he started providing soil testing services from his Minneapolis home. As the company grew and evolved to adapt to industry changes, new services were added, including environmental consulting and geotechnical engineering. Extending beyond Minnesota borders, Braun Intertec brought its expertise to other neighboring states, including North Dakota, Iowa, and Wisconsin. In 2015, our company has expanded further into Texas as well as into Kansas, Louisiana, and Oklahoma."

Today, Braun Intertec is "a 100% employee-owned consulting firm that provides geotechnical engineering, environmental consulting, and testing solutions for private and public sectors," and is a leading consulting engineer for the transportation industry.
