MN Best, Inc.

Founded in 2007 by renowned entrepreneur and business professional, Hyon Kim, MN Best has quickly established itself as a key provider of scheduling services, training and enterprise implementation support in the Twin Cities. The company's expert staff has provided project controls support on multi-million dollar civil construction projects and consultant support on agency-wide program management efforts. Their team consists of expert civil engineers, schedulers, inspectors and construction managers covering contract administration, construction oversight, environmental compliance, project controls, inspection, schedule and cost management. Their clients include MnDot, AECOM, and Minnesota State University - Mankato.

Today, the company continues to expand its services to include Project management and planning, as well as engineering and training support, and is a leading Business for the transportation industry.
